Medical Device Manufacturing

info@metalfx.com

METALfx has been a leading supplier of components utilized in the medical device and equipment field for a number of years and has served such industry leaders as, Mizuho/OSI, Bio-Rad, Applied Bio-Systems, Zeltiq, Microchip Bioscience, Optiscan, and Onyx.

We have extensive experience manufacturing our customers ascetically demanding requirements in medium and low volumes via a KanBan delivery system.

In this highly technical field METALfx provides experienced engineering capabilities to our customers. Our Engineering CAD Network is configured to provide a direct upload and download capability with participating customers, utilizing multiple formats, as well as uploading and downloading to our FTP site or from your FTP site. Our programmers then utilize this system for unfolding your 3D CAD files and developing programs for our direct-linked CNC manufacturing equipment. This system helps us to provide rapid response for engineering changes and prototype projects for our customers, as well as providing support to our daily production requirements.
